

MAIN METHOD:

```
addHost(hosts, "Meyers", "Seth", "0008", "12/28/1973");
```

ADD HOST METHOD:

```
public static void addHost(List<Host> hosts, String lastName, firstName, hostNumber, String birthday) {  
    SimpleDateFormat formatter = new SimpleDateFormat("MM/dd/yyyy");  
    Host host = null;  
    Date date = null;  
  
    try {  
        date = formatter.parse(birthday);  
    } catch (Exception e) {  
        e.printStackTrace();  
    }  
  
    host = new Host(lastName, firstName, hostNumber, date);  
  
    hosts.add(host);  
}
```

READ TALKSHOW METHOD:

```
SimpleDateFormat formatter = new SimpleDateFormat("MM/dd/yyyy");  
  
Date birthday = formatter.parse(tokens.nextToken());  
  
host.setBirthday(birthday);
```

WRITE TALKSHOW METHOD:

```
SimpleDateFormat formatter = new SimpleDateFormat("MM/dd/yyyy");  
  
String birthday = formatter.format(host.getBirthday());  
  
bw.write(  
    host.getLastName() + " "  
    + host.getFirstName() + " "  
    + host.getHostNumber() + " "  
    + birthday  
    + System.getProperty("line.separator");
```
