

CIS 255 - Java Programming
Project #7
Array Methods

Name: _____

Date: _____

Write the interactive Java class Project7 that has the methods max(a) which returns the largest value in double array a, and has the method reverse(a) which reverses the values in array a. Display the maximum value to the user, and display each value in the array after reversing. The array will have a length of 5 and will be populated from user input.
