

**CIS 255 - Java Programming**  
**Homework #6 (Notes)**  
**Methods**

**Name:** \_\_\_\_\_

**Date:** \_\_\_\_\_

1. Write a method `showAvg(a, b, c)` which prints the average of distinct integers `a`, `b`, and `c` to the screen. (The method does no input). Write an interactive Java class to test `showAvg` using the variables `alpha`, `beta`, and `gamma`.
